

Toward Modern Models of Introductory Computing
Courses – CS1 and CS2 Course Exemplars infused with
Parallel and Distributed Computing Concepts¹

¹NSF Award #2321015

Contents

0	An Overview and Roadmap	12
0.1	Introduction	15
0.2	Project Focus and Team Structures	17
0.3	Methodology Employed	18
0.3.1	PDC Topics Chosen: Data Parallelism, Distributed Data Access, and Event Driven Processing	18
0.3.2	Testing team recruitment	19
0.3.3	Collaboration among Development and Testing teams, and support of Backbone team	20
0.3.4	Exemplar Creation and Testing by the Development Teams	21
0.3.5	Adaptation and Adoption by Testing Teams	22
0.3.6	Evaluation Methods	22
0.4	Faculty Learning Community Formation	23
0.5	Roadmap for Subsequent Chapters (Sushil)	24
0.5.1	Start from Your Adoption Goal	24
0.5.2	CS1 Exemplars at a Glance	24
0.5.3	Using Chapter 1 with Institutional Chapters	25
0.5.4	Finding Materials Quickly	26
0.5.5	Summary Guidance	27
	Appendix	28
PART I	- Computer Science 1 (CS1)	31
1	Common CS1 Activities and Lessons	32
1.1	Introduction	34
1.2	How CS1 was changed and PDC topics integrated (April)	36
1.2.1	Challenges (April)	38
1.3	New Unplugged Activities	38
1.3.1	Flag Maker (David, April)	38
1.3.2	Unplugged Penny Search Activity (Srishti)	42
1.3.3	Using Animations (Sue)	48
1.4	New Plugged-in Activities	55
1.4.1	Programming Flag Maker (Used by Knox and USI in CS1)	55
1.4.2	Greenfoot (Used by Knox (CS1), USI (CS1), Caspar (CS2), MSU (CS2))	58
1.4.3	Plugged-In Earthquake Activity (April)	61

1.5	Course-wide Pre and Post Course Surveys (Chris, Neena)	62
1.6	Conclusion	63
	Bibliography	68
2	CS1 course package - TNTECH	69
2.1	Introduction	73
2.2	How CS1 was changed and PDC topics integrated	75
2.2.1	Integrated Syllabi (Pre and Post)	76
2.2.2	PDC Topics Integrated	77
2.2.3	Highlights	79
2.2.4	Challenges	79
2.3	New Unplugged Activities	80
2.3.1	Unplugged Penny Activity	80
2.3.2	Unplugged Flag Maker Activity	84
2.4	New Plugged-in Activities	86
2.4.1	Plugged-In Earthquake Activity	86
2.4.2	Plugged-In OpenMP Data Parallelism Assignment	92
2.5	Course-wide Pre and Post Course Surveys	98
2.5.1	Results of Pre-Course and Post-Course Surveys	99
2.6	Conclusion	101
	Bibliography	105
	Appendix	106
3	CS1 course package - Knox	110
3.1	Introduction	113
3.2	How CS1 was changed and PDC topics integrated	113
3.2.1	Course calendar	113
3.2.2	Challenges	113
3.3	New Activities	114
3.3.1	Flag Maker	114
3.3.2	Knoxcraft	117
3.3.3	Greenfoot	118
3.4	Course-wide Pre and Post Course Surveys	119
3.5	Conclusion	119
	Bibliography	120
	Appendix	121
4	CS1 course package - USI	122
4.1	Introduction	128
4.2	How CS1 was changed and PDC topics integrated	128
4.2.1	Integrated Syllabi (Pre and Post)	129
4.2.2	Highlights	130
4.2.3	Challenges	131
4.3	New Unplugged Activities	132
4.3.1	Unplugged Flag Maker Activity	132

4.3.2	Unplugged Penny Sorting Exercise	137
4.4	New Plugged-in Activities	140
4.4.1	Flag Maker Plugged-In Activity	140
4.4.2	Parallel Penny Sort Plugged-In Activity	143
4.4.3	Greenfoot Plugged-In Demo (time permitting/optional for CS1)	146
4.5	Course-wide Pre and Post Course Surveys	148
4.5.1	Results and Analysis: Fall 2024 Benchmark Survey Data	149
4.5.2	Results and Analysis: Fall 2025 PDC Intervention Survey Data	151
4.5.3	Did the PDC Intervention Improve Learning?	154
4.6	Other Activities and Ideas	155
4.6.1	More Processors are Not Always the Best	155
4.7	Conclusion	158
4.7.1	Future Work	159
	Bibliography	160
	Appendix	161
5	CS1 course package - UNL	164
5.1	Introduction	167
5.2	How CS1 was changed and PDC topics integrated	167
5.2.1	Integrated Syllabi (Pre and Post)	168
5.2.2	Challenges	168
5.2.3	Student Time Commitment	168
5.3	New Unplugged Activities	169
5.4	New Plugged-in Activities	169
5.4.1	Codeless PDC Modules	169
5.4.2	Structure	169
5.5	Course-wide Pre and Post Course Surveys	173
5.6	Other Activities and Ideas	173
5.6.1	Lab: Processing a Remote Data Source	174
5.6.2	Programming: Vibe Coding a Client-Server Battleship Game	174
5.7	Conclusion	174
	Bibliography	177
	Appendix	178
6	CS1 course package - Webster	179
6.1	Introduction	181
6.2	How CS1 was changed and PDC topics integrated	181
6.2.1	Integrated Syllabi (Pre and Post)	182
6.2.2	Highlights	182
6.2.3	Challenges	185
6.3	New Unplugged Activities	185
6.3.1	Animations and Visualizations	185
6.4	New Plugged-in Activities	186
6.4.1	Zombie Attack Assignment	186
6.5	Course-wide Pre and Post Course Surveys	188

6.6	Other Activities and Ideas	188
6.7	Conclusion	190
	Bibliography	191
	Appendix	192
7	CS1 course package - Casper	199
7.1	Introduction	203
7.2	How CS1 was changed and PDC topics integrated	203
7.2.1	Integrated Syllabi (Pre and Post)	204
7.2.2	Highlights	205
7.2.3	Challenges	205
7.3	New Unplugged Activities	205
7.3.1	zyBooks Section 1.9 Parallel Computing	205
7.3.2	Unplugged Penny Search Activity	206
7.3.3	Unplugged Coin Addition Activity	209
7.4	New Plugged-In Activities	211
7.4.1	Plugged-In OpenMP Array Creation Assignment	211
7.4.2	Plugged-In OpenMP Array Sum Assignment	213
7.4.3	Plugged-In Distributed Data USGS API Earthquake Assignment	216
7.4.4	Plugged-In Physical Computing 1 Introduction and Traffic Light	218
7.4.5	Plugged-In Physical Computing 2 Buttons and Multiple Processes	220
7.4.6	Plugged-In Physical Computing 3 Temperature Sensor	222
7.5	Course-wide Pre and Post Course Surveys	223
7.6	Conclusion	228
	Bibliography	229
	Appendix	230
8	CS1 course package - HPU	231
8.1	Introduction	235
8.2	How CS1 was changed and PDC topics integrated	235
8.2.1	Integrated Syllabi (Pre and Post)	235
8.2.2	Highlights	237
8.2.3	Challenges	237
8.2.4	Unplugged Activities	238
8.3	New Unplugged Activities	239
8.3.1	Unplugged - Flag Maker Activity	239
8.3.2	Unplugged - Penny Activity	244
8.4	New Plugged-in Activities	249
8.4.1	Plugged-in - Parallel Sort Penny Activity	249
8.5	Course-wide Pre and Post Course Surveys	254
8.6	Other Activities and Ideas	259
8.6.1	Unplugged Activity - More Processors (MP) Writing Activity	259
8.6.2	Ideas on Activities	261
8.7	Conclusion	262
	Bibliography	265

Appendix	266
9 CS1 course package - MSU	268
9.1 Introduction	272
9.2 How CS1 was changed and PDC topics integrated	272
9.2.1 Integrated Syllabi (Pre and Post)	272
9.2.2 Highlights	273
9.2.3 Challenges	274
9.3 New Unplugged Activities	275
9.3.1 Flag Maker	275
9.4 New Plugged-in Activities	278
9.5 Course-wide Pre and Post Course Surveys	278
9.6 Other Activities and Ideas	282
9.7 Conclusion	282
Bibliography	284
Appendix	285

List of Figures

1	Project activities and Timeline. Box fill colors categorize activities as development (yellow), evaluation (light green), training and support (peach), and running the new courses (purple).	16
2	Suggested reading paths by CS1 adoption goal.	24
3	Organization of Chapter 1 – common CS1 activities and adoption-guidance.	26
4	Common structure of institutional exemplar chapters.	27
1.1	Flag of Mauritius [12]	40
1.2	Graphical depiction of the Flag Maker scenarios: Scenario 1 (top left), Scenario 2 (top right), Scenario 3 (bottom left), and Scenario 4 (bottom right). P1–P4 depict the regions to be colored by each “processor”. The cells after Scenario 1 are numbered to show the order in which they should be colored.	41
1.3	Modified ASPECT survey used for the Penny Sorting unplugged activity	48
1.4	Parallel Search Animation	49
1.5	Parallel Linked List Animation	50
1.6	Flag Coloring Animation	51
1.7	Zombie Attack Animation	52
1.8	Responses from participants	53
1.9	The students were then asked if they felt prepared to apply parallel computing concepts to new problems beyond this activity. 18.2 % strongly agreed with it. 54.5% agreed and 27.3 % were neutral.	54
1.10	Example C program displayed as verbatim text.	55
1.11	The Lithuanian flag, as rendered by the Flagmaker assignment.	55
1.12	The assignment piece for the Japanese flag.	64
1.13	Solution as text for the Lithuanian flag.	64
1.14	The Hedgehog example in Greenfoot. Notice how Actors are clearly organized in the IDE	65
1.15	Example of how to move an actor in Greenfoot. Note the simplicity and elegance of the code.	65
1.16	Example of setActOrder() method showing how to define a specific order for Greenfoot to call the act() methods.	66
2.1	TNTECH CS1 Prior Programming Experience	75
2.2	TNTECH Organization of Pennies	80
2.3	TNTECH CS1 Penny Activity Phase 1	81
2.4	TNTECH CS1 Penny Activity Phase 2	82

2.5	TNTECH CS1 Penny Activity Phase 3	82
2.6	TNTECH CS1 Penny Activity Phase 4	82
2.7	TNTECH CS1 Box of 5,000 Pennies	83
2.8	TNTECH CS1 Level of Agreement for all of Lab 1 that included Unplugged Penny Activity	84
2.9	TNTECH CS1 Prizes Used for Flag Maker Activity	85
2.10	TNTECH CS1 Results of Flag Maker Pre-Quiz and Post-Quiz	87
2.11	TNTECH CS1 Results of Flag Maker Post-Activity Survey	88
2.12	TNTECH CS1 Screenshot of Earthquake Tracker Assignment	89
2.13	TNTECH CS1 Time to Complete Earthquake Assignment (All Semesters)	90
2.14	TNTECH CS1 Estimated Time to Complete Earthquake Tracker Assignment	91
2.15	TNTECH CS1 Level of Agreement Earthquake Tracker Assignment	92
2.16	TNTECH CS1 Screenshot of Plugged-In OpenMP Data Parallelism Assignment	93
2.17	TNTECH CS1 Hours Spent on Plugged-In OpenMP Lab Assignment	96
2.18	TNTECH CS1 What Students Learned from Plugged-In OpenMP Data Parallelism Assignment	97
2.19	TNTECH CS1 Level of Agreement OpenMP Data Parallelism Lab Assignment	98
3.1	Flag coloring assignment version of the flag of Great Britain	115
3.2	Dependency graph for coloring the flag of Great Britain	115
3.3	Flag coloring assignment version of the flag of Jordan	115
3.4	Dependency graph for coloring the flag of Jordan	116
3.5	Parallel Knoxcraft Turtles.	117
4.1	USI CS1 Pre vs Post Percentage of Correct Questions for N=24	135
4.2	USI CS1 Response Distribution by Item	136
4.3	USI CS1 Thematic Analysis of Open Response Survey Questions	137
4.4	USI CS1 Diverging Likert Distribution of Engagement Items (n = 33)	140
4.5	USI CS1 Example Flag Represented as a Colored Grid and Corresponding Code	141
4.6	USI CS1 Fall 2024 Pre to Post Shift on Every Survey Item	150
4.7	USI CS1 Fall 2025 Pre to Post Shift on Every Survey Item	153
4.8	USI CS1 Improvement of Each Item from Benchmark Fall 2024 to PDC Intervention Fall 2025	154
4.9	USI CS1 Pre to Post Gains on Four PDC Measures: Parallel Processing, Distributed Computing, and PDC Understanding	155
4.10	USI CS1 Progressive Operational Activity Phases to Benchmark Execution Time	157
5.1	A screenshot of Module 1.0's Parallel Computing Demo	171
5.2	Example run of parallel password cracking. The contents of a dictionary are split among a specified number of threads ("down" to "mallorca" for example).	172
5.3	A screenshot of Module 3.0's Producer-Consumer Demo	172
6.1	Flag coloring animation	186
6.2	Zombie Attack homework: Red grid represents Zombie and Blue grid represents unaffected human	187

6.3	Pre/post comparison of student self-reported experience with PDC-related concepts. Mean ratings are reported on a seven-point scale.	195
6.4	Pre/post comparison of student self-reported programming experience across core C++ topics.	196
6.5	Pre/post comparison of student attitudes, interest, and self-reported understanding.	196
7.1	Custom zyBooks Section 1.9	207
7.2	Custom zyBooks Section 1.9 continued	208
7.3	CASPER CS1 Part 1 of Plugged-In OpenMP Array Creation Assignment . .	212
7.4	CASPER CS1 Part 2 of Plugged-In OpenMP Array Creation Assignment . .	213
7.5	CASPER CS1 Part 2 of Plugged-In OpenMP Array Creation Assignment . .	214
7.6	CASPER CS1 Part 3 of Plugged-In OpenMP Array Creation Assignment . .	214
7.7	CASPER CS1 Part 1 of Plugged-In OpenMP Array Sum Assignment	215
7.8	CASPER CS1 Part 3 of Plugged-In OpenMP Array Sum Assignment	216
7.9	CASPER CS1 Hardware Circuit for Physical Computing Project 1	219
7.10	CASPER CS1 Physical Computing project 2 given code for instruction on the python multiprocessing package	221
7.11	CASPER CS1 Sample Survey Question Reflecting on Level of Experience . .	225
7.12	CASPER CS1 Sample Survey Question Reflecting on Level of Interest in Computing and PDC	226
8.1	Flag Maker Aspect Categories	243
8.2	Penny Activities Aspect Categories	248

List of Tables

1	Quick comparison of CS1 institutional exemplars for potential adopters. . . .	25
1.1	Common CS1 PDC activity finder	34
1.2	Additional institutional CS1 PDC activities	35
2.1	TNTECH CS1 Learning Outcomes & Blooms Levels	71
2.2	TNTECH CS1 Student Majors by Semester	72
2.3	TNTECH CS1 Student Gender Identity	73
2.4	TNTECH CS1 Race/Ethnicity of Students (Select All that Apply)	73
2.5	TNTECH Classification of CS1 Students	74
2.6	TNTECH CS1 Student Experience with General Computing	74
2.7	TNTECH Student Programming Experience Entering CS1	74
2.8	TNTECH CS1 Spring 2026 Course Syllabus Calender with Highlighted PDC Content	76
2.9	TNTECH CS1 Flag Maker Thematic Response to Student Interest in Activity	87
2.10	TNTECH CS1 Flag Maker Thematic Response to Student Feedback in Activity	88
2.11	TNTECH Sample Size for Pre-Course and Post-Course Surveys	99
2.12	TNTECH CS1 Baseline Results: Spring 2024	100
2.13	TNTECH CS1 Intervention Results: Fall 2024, Spring 2025, Fall 2025, and Spring 2026 Combined	103
4.1	USI CS1 Relevant PDC Topics and Blooms Levels	124
4.2	USI CS1 Gender Distribution	126
4.3	USI CS1 Race/Ethnicity Distribution	126
4.4	USI CS1 Class Standing	126
4.5	USI CS1 Declared Majors	127
4.6	USI CS1 Self-Reported General Computing Experience	127
4.7	USI CS1 Self-reported prior programming experience of CS1 participants . .	127
4.8	USI CS1 Fall 2025 Course Syllabus Calender with Highlighted PDC Content	129
4.9	USI CS1 Approximate Timing of Flag Maker Activity	134
4.10	USI CS1 Approximate Timing of Unplugged Penny Sorting Exercise	138
4.11	USI CS1 Approximate Timing of the Flag Maker Plugged-In Activity	142
4.12	USI CS1 Approximate Timing of the Penny Sort Plugged-In Activity	145
4.13	USI CS1 Approximate Timing of the Greenfoot Plugged-In Demo	148
4.14	USI CS1 Pre/Post Survey Results from Benchmark Fall 2024	149
4.15	USI CS1 Pre/Post Survey Results from PDC Intervention Fall 2025	152

4.16	USI CS1 Combined Pre/Post Survey Results from Fall 2024 and Fall 2025	156
5.1	UNL CS1 Learning Outcomes & Blooms Levels	165
5.2	Week-to-Week Modules for UNL's CS1	168
5.3	Time Commitment for CS1 Activities - UNL	169
5.4	Survey Results for CS1 - UNL. Sample size was 125 and included data from fall 2024 and fall 2025 semesters. The pre- and post means are reported along with the difference (Diff). Statistical significance is measured using a non-parametric Wilcoxon signed-rank (paired) test. The Wilcoxon statistic (W) is reported along with the p -value. Significance is indicated as Yes using $p < 0.05$. Effect size is reported using Cliff's Delta (δ). A negative value indicates an increase in the post-survey data. The interpretation of the effect size is reported (negligible, small, medium, large) as suggested by [5].	176
6.1	PDC topics and their corresponding levels in the revised Bloom's Taxonomy.	181
6.2	Sequential and parallel versions of summing values in an array.	183
6.3	Summary of PDC activities integrated into the CS1 course.	189
6.4	High-level syllabus with PDC enhancements in CS1.	192
6.5	Pre/post changes in PDC-related experience. Percent favorable is the percentage of responses coded 5 or higher.	194
6.6	Pre/post changes in programming experience across core C++ concepts.	197
6.7	Pre/post changes in interest, perceived importance, and self-reported understanding.	197
6.8	Post-survey ratings of course learning activities.	197
6.9	Post-survey ratings of course learning outcomes.	198
7.1	CASPER CS1 Relevant PDC Topics and Bloom's Levels	201
7.2	CASPER CS1 Baseline versus Summer 2025 PDC Intervention	204
7.3	CASPER CS1 Baseline versus Spring 2026 PDC Intervention	204
7.4	CASPER CS1 Survey Results for Experience Questions	224
7.5	CASPER CS1 Survey Results Experience with PDC Topics	226
7.6	Survey Results for CS1 Interest Questions- Casper College	226
7.7	CASPER CS1 Survey Results Interest Questions	227
7.8	CASPER CS1 Survey Results for Understanding Questions	227
8.1	Bloom's Taxonomy Levels Addressed by Each PDC Activity	232
8.2	Syllabus Pre- and Post-PDC Topics Added	236
8.3	Estimated Instructional Time for Unplugged Flag Maker Activity	240
8.4	Pre-test and Post-test Performance by Question	242
8.5	Student Engagement Survey Results Grouped by ASPECT Categories	244
8.6	Estimated Instructional Time for Unplugged Penny Activity	246
8.7	Student Engagement Survey Results Grouped by Adapted ASPECT Categories for the Penny Activities	250
8.8	Estimated Instructional Time for Plugged-In Parallel Sort Penny Activity	251
8.9	Comparison of Pre- and Post-Course Survey Results (Fall 2024)	255
8.10	Comparison of Pre- and Post-Course Survey Results (Fall 2025)	256

8.11	Comparison of Pre- and Post-Course Survey Results (Spring 2026)	257
8.12	Estimated Instructional Time for Unplugged MP Writing Activity	260
9.1	Relevant PDC topics and Bloom’s levels	270
9.2	MSU CS1 Gender Distribution	271
9.3	MSU CS1 Race/ethnicity Distribution	271
9.4	MSU CS1 Current Class Standing Distribution	271
9.5	Summary comparison of CS1 before and after PDC integration.	273
9.6	Post-integration CS1 course schedule with PDC integration highlighted.	274
9.7	Summary of Flag Maker post-activity survey responses.	277
9.8	Themes from open-ended Flag Maker activity responses.	278
9.9	CS1 survey results for basic programming skills.	280
9.10	CS1 survey results for PDC concepts.	280
9.11	CS1 survey results for attitudes and beliefs.	280
9.12	Matched pre- and post-course survey results for basic computing concepts in CS1.	281
9.13	Matched pre- and post-course survey results for PDC concepts in CS1.	281
9.14	Matched pre- and post-course survey results for attitudes and perceptions in CS1.	282
